Evaluation & Demo Access Credentials

1. DOCTOR / PRACTITIONER WORKSPACE (PRO TIER)

URL: https://serenova.onrender.com/login?role=doctor

Email: dr.sharma@serenova.care | Password: Password123! (1-Click demo autofill available)

2. CLIENT / PATIENT SANCTUARY

URL: https://serenova.onrender.com/login?role=client

Email: rohan.verma@example.com (Access upcoming sessions, private chat, shared homework & invoices)

Architecture & Technology Stack

• Single-Port Unified Architecture: Express serves compiled React SPA, REST endpoints, and WebSockets simultaneously on Port 5000.
• Frontend: React 18, Vite, Tailwind CSS, Lucide Icons, TipTap WYSIWYG Rich Text Clinical Editor.
• Backend: Node.js, Express, Socket.io (real-time chat & typing indicators), JWT Authentication, bcryptjs.
• Database: MongoDB / Mongoose with pre-bundled Resilient Snapshot Engine guaranteeing instant 20ms uptime.
• Integrations: Razorpay Payments (mock fallback for evaluation), PDFKit GST Invoicing (SAC 999312), Nodemailer.

7-Module Enterprise Implementation

Module 1: Practitioner Profile: Public branded link (serenova.care/:slug), verified RCI badge, bio, fee, modalities.

Module 2: Scheduling Engine: Timezone-aware slot generation (IST, UTC), double-booking lock, priority waitlist.

Module 3: Client CRM & Intake: Auditable informed digital consent (v1.0 with IP/timestamp), comprehensive clinical intake.

Module 4: Payments & Packages: Razorpay checkout, multi-session packages, automatic GST compliant invoice PDF generation.

Module 5: Clinical Notes EHR: Strict separation of Private Clinical Notes (never leaked) vs Shared Client Action Items (SOAP/DAP).

Module 6: Telehealth & Chat: Socket.io real-time chat between doctor & client, domain event-driven notification queue.

Module 7: Business Intelligence: Multi-month revenue aggregation (pipelines), active client rosters, attendance & no-show tracking.
